Relevant Courses

- Backend Development
- Frontend Web Development
- Frontend Mobile Development
- Data and Software Architecture
- UX/UI Design
- Quality Assurance
- UX Research
- Product Management

Personal Statement

Robotic surgery marks a remarkable milestone in medicine, transforming what surgeons can do. Curious about how machines are extending human ability, Danait gained insight into how technology enhances precision, flexibility, and control in the operating room. This experience deepened her passion for a field that not only saves lives but also redefines efficiency and possibility in patient care.

Skills/ Experience

Collaborated within a team on a case study to support local grocery vendors ("Mama Mbogas") by analyzing sales declines, customer behavior, and market competition, and recommending data-driven strategies to address these challenges.

- Conducted primary and secondary research to examine market obstacles and uncover practical solutions.
- Designed a system architecture diagram illustrating components and the data flow within them.
- Leveraged PostgreSQL to design relational schemas to ensure data integrity.
- Designed brand assets for Mama Mboga, such as logos, wireframes, and mockups using Figma and Adobe Illustrator.
- Developed an informational website using HTML, CSS, and JavaScript.
- Built RESTful APIs with Django to ensure efficient data flow.
- Integrated internal and external APIs using React.js.
- Implemented thorough testing strategies, including unit and integration tests, to enhance system quality.
- Built an AI agent that provides personalized nutrition plans for customers.
- Built a mobile app using Kotlin that connects vendors and customers.

Projects

Greens Mtaani

Developed Greens Mtaani, an advanced Progressive web app that helps local grocery vendors (Mama Mbogas) connect with customers and manage their inventory and orders digitally.
