EDUCATION

AkiraChix

codeHive - Diploma in Information

Technology

February 2025-Present

SKILLS

- Frontend Web Development
- Backend Development
- Frontend Mobile Development
- UX/UI Design
- Data and Software Architecture
- Product Management
- Quality Assurance
- UX Research

ABOUT ME

With a growing awareness of the urgent challenges posed by climate change, Joyline is drawn to the ways technology is reshaping our approach to sustainability. This transformation offers an exciting opportunity to rethink sustainable systems. For her, working in tech is about being part of a community of like-minded individuals who strategically address one of the most critical issues of our time.

EXPERIENCE

Worked with a team to digitize dairy cooperatives in Rwanda to improve record-keeping, boost transparency, and streamline payments for the farmers in the cooperatives.

- Conducted desk and primary research to identify core challenges and possible solutions.
- Designed logos, mockups, and UI wireframes using Figma and Adobe Illustrator.
- Developed an informational website using HTML, CSS, and JavaScript.
- Utilized a PostgreSQL database to organize and link complex data.
- Built a scalable system architecture diagram to illustrate data flow between components of the system.
- Developed APIs using Django REST framework to manage the users' data.
- Built an admin dashboard using React.js to highlight real-time analytics.
- Developed a mobile app using Kotlin that enables farmers to view their progress.
- Created and executed testing strategies, including integration testing and unit testing, to guarantee stable and reliable applications.

PROJECTS

Imbuto hub

A web and mobile app designed to improve record-keeping and ensure transparent payments in Rwandan cooperatives.

- Research Report: [Imbuto Research Report](#)
- Visual Designs: [Imbuto designs](#)
- System Architecture: [Imbuto system architecture](#)
- Entity relationship diagram: [Imbuto ERD](#)
- APIs: [Imbuto APIs](#)

IddirNet

A user-friendly platform that boosts transparency and accountability in Ethiopian Iddir communities by enabling real-time monitoring of funds and resources.

- Research Report: [IddirNet Research Report](#)
- Product Requirements Document(PRD): [IddirNet PRD](#)
- System Architecture: [IddirNet system architecture](#)
- Visual Designs: [IddirNet designs](#)
