EDUCATION

AkiraChix

codeHive

Diploma in information Technology

February 2025 - present

SKILLS

- Data and Software Architecture
- Frontend Web Development
- Quality Assurance
- UI/UX design
- Frontend Mobile Development
- Backend Development
- UX Research
- Product management

REFERENCE

Linda Kamau

PERSONAL STATEMENT

Technology has long reshaped the possibilities of architecture, with digital design tools transforming how buildings are imagined and built. Marion is driven by the power of innovation, blending sustainability, functionality, and beauty into designs. For her, architecture is not just about designing buildings; it's about pushing boundaries through technology and exploring new concepts that leave a lasting impact.

EXPERIENCES

- Created a system architecture diagram showing data flow between components.
- Built an informational website using HTML, CSS, and JavaScript.
- Built an admin dashboard using React to track of key performance indicators.
- Designed logos and UI wireframes using Figma and Adobe Illustrator.
- Created a mobile application using Kotlin to help grocery vendors reach customers.
- Developed internal APIs and integrated external APIs using Django REST framework.
- Utilized Postman to test endpoints to ensure functionality.
- Wrote and executed test cases to ensure system functionality and accuracy.
- Conducted research to identify market gaps and came up with a possible solution.

PROJECTS

BioPima

BioPima is an IoT device that helps biogas users keep track of the state of their digesters and sends real-time data to a dashboard.
